

## 4D Disk Manager and Reader Writer By Janice Henning

I can use my 4D Reader/writer program and my Disk Manager program without the dongle attached to the computer. I have a computer upstairs that I use for most of my computer work but I also have one in my sewing room that I want to be able to get designs to my card or to a floppy without having to remove the dongle from my upstairs computer.

You can put a shortcut on your desktop for the Reader/Writer or Disk Manager instead of opening the 4D Embroidery program to get to the Quick Links.

To get those programs on your desktop, right click on “start” and click on “explore” and then click on the C drive and then click on the 4D Embroidery folder and find the 4D Disk Manager USB.exe file. Right click on that file and click on “send to, desktop as shown below.

If you need the reader/writer, then right click on the file called “4D Reader/writer USB.exe file and send to desktop.
