

Deleting fonts my “my fonts” by Janice Henning

You may have used Quick fonts to add some fonts to “my fonts” and now you want to remove them.

Open the Explorer and double click on the 3D or 4D Embroidery folder to open up and reveal the files and folders in 4D. Scroll down to the “system” folder and double click on it.

Scroll down to the “fonts” folder and click on “my fonts” and on the right side you will see the fonts in that folder.

Right click on the font you don't want and click on “delete”.
