

Internet Explorer 8 (IE8) missing command and menu bars

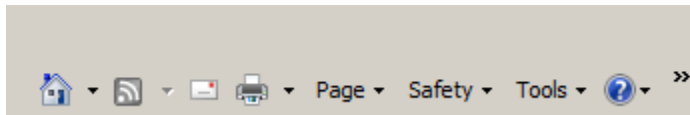

This is a picture of the **menu bar** that was missing from the left side of the screen when I first got IE8.

This is a picture of the **command bar** on the right side of your screen to be able to go directly to your home page with the “house” icon or print or send a direct link in an email, etc.

This is a close-up of the right side.

To have both of these important bars, right click on the lower part of the grey area and this is how mine looks. You may not need all that I do, but I find the menu bar and command bar so helpful.
