

## Print folders of designs in Organizer *by Jan Henning*

Open the Organizer and on the left side, click on the "+" in front of "my computer" to reveal the files on the computer.

Click on the C drive. I don't know where you have your design folders. But, just click on a folder of designs that you want to print out.

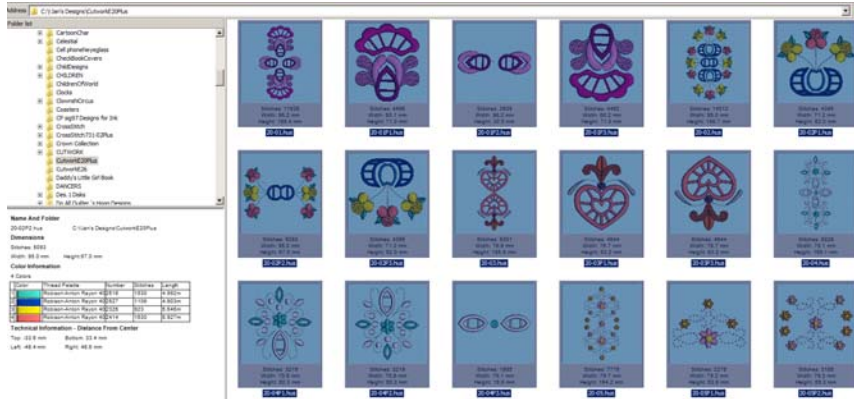

Click on **"file, page setup"**. Look at **"layout"**. You can print one design per page which is "full worksheet". You have a choice to have 2 columns and 2 rows which would make the pictures pretty large. You can choose 4 rows with 2 designs on each row. As you click on these choices, it will give you a preview of what it would look like. I chose 4X8 and that is 8 rows with 4 pictures on each row.

Under **quality**, choose **"normal"**.

If you want a table of contents printed for that folder of designs, then click on that too. **You can type your name next to created by.** Close the screen.

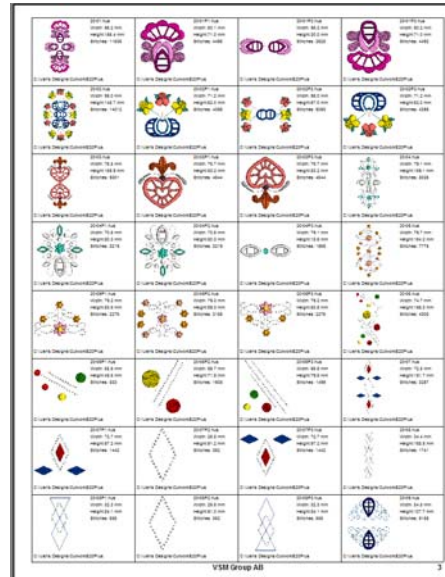

Click on **"edit, select all"** to highlight all of the designs so they are selected for printing.

Click on "file, print preview". The first page shows the contents of the whole works. Click on "next page" and it shows how the designs will look printed out. Notice it tells the name of the design, the dimensions and the # of stitches and what folder you are printing.

If that suits you, then click on "print" at the top left side. Click on "close" to close the screen. It will not close with the X in the right corner.
